

CURRICULUM COMMITTEE

ACTION ITEM PROPOSAL MARCH 2020 FACULTY MEETING

Executive Summary in one paragraph

HSC411 coming from the Dept. of Health Science as a new course. This course will serve as one of several capstone options for Health Science majors in the Health Promotion track.

This course has been reviewed and approved by the Curriculum Committee.

The syllabus and aligned documents should be posted for faculty review for approval of syllabi at the next Faculty Meeting.

Exact Wording of the Proposed Motion

The committee proposed to:

Move to vote on the approval of HSC411-Epidemiology.

Who the proposal will affect and how

Health Science majors.

Summary of Proposal's Critical Issues

The Curriculum Committee has no critical issues with this submission.

The Faculty Council discussion raised a couple of concerns:

- 1) Biology has apparently had no discussion with Health Science about possible redundancies or cross-listings;
- 2) The syllabus is written in such a way that it is not clear if there are two or one prerequisites.

Affirmation of majority approval of the submitting body
